I went into trial mode and wasted \$140 so I have to pay for this version? If there is a way to exchange for a free version then I would just do that instead of having to pay for the full version. Yea I think that would be the best way to do it. I have used the trial version and it seems pretty good so if there was a way to work something out or trade it for free it would be a good way to go. I have only had the CS6 trial, but I will tell you that you cannot trade it back to CS5. However, you can pay for the full version of CS6 to get the unlimited use. All of the CS6 features are there, with all of the features unlocked. You just need to go into your CS6 program and update it. With the free version, you cannot use all of the new features. You also do not have all of the time for it. You have 30 days. If you do not want to use it after the 30 days, go to your CS5 program and you can start using it again. If you are happy with it and want to continue using it, then you can pay for the full version. I did the trial and it was cool but I was afraid that after 30 days that I would have to buy it so I payed for the full version. I do not know if you can trade the trial version with another user but if so that would be great. I liked the software but it was hard to get used to it. It was not what I was used to with my previous software, CS5. After the trial, I have to take a picture a different way because CS5 did it automatically, CS6 does not do it automatically.
